## List of Current Papers

published for

THE AERONAUTICAL RESEARCH COUNCIL  
(Numbers 801-850)

and placed on sale by H.M. Stationery Office

C.P. No.	Council No.	Title	Author(s)
801	26 551	An experimental investigation into the determination of lift from wake traverses at supersonic speeds. (September, 1964)	Wooller, J. and Firmin, M. C. P.
802	26 436	Wind tunnel measurements of the far-field pressures due to some lifting, slender delta wings. (August, 1964)	Cook, T. A.
803	26 700	Wind tunnel measurements at Mach numbers up to 2.80 of the effects of gulling on the longitudinal and lateral stability and drag of a cambered, slender ogee wing. (August, 1964)	Cook, T. A.
804	26 701	Wind tunnel tests at Mach numbers up to 2.80 to determine the effects of changing spanwise volume distribution on a slender, cambered ogee wing. (August, 1964)	Cook, T. A.
805	24 337	Tests with a variable ramp intake having combined external/internal compression, and a design Mach number of 2.2. (August, 1962)	Neale, M. C. and Lamb, P. S.
806	25 350	On the calculation of cascade flows. (November, 1963)	Hall, W. S. and Thwaites, B.

C.P. No.	Council No.	Title	Author(s)
807	25 829	Potential flow through cascades - a comparison between exact and approximate solutions. (November, 1963)	Gostelow, J. P.
808	26 168	Potential flow through cascades - extensions to an exact theory. (July, 1964)	Gostelow, J. P.
809	25 416	Measurement of air temperature on an aircraft travelling at high subsonic and supersonic speeds. (September, 1963)	Woodfield, A. A. and Haynes, P. J.
810	25 489	The unsteady motion of slender wings with leading-edge vortices. (January, 1964)	Dore, B. D.
811	26 090	The chemical contouring of 30% chromium-molybdenum-vanadium and 5% chromium-molybdenum-vanadium high strength steel sheet. (March, 1964)	Bristol Aerojet Ltd.
812	26 155	Influence of chemical contouring on the fatigue and sustained load properties of high tensile steel sheet. (May, 1964)	Westland Aircraft Ltd., Saunders-Roe Division
813	26 159	Theoretical investigation of some basic assumptions of Schlichting's singularity method of cascade analysis. (September, 1964)	Lewis, R. I. and Pennington, G. A.
814	25 661	Measurements of skin friction in an annulus by the floating element technique. (February, 1964)	White, J. K. and Franklin, R. E.
815	26 761	Measurements of oscillatory derivatives at Mach numbers up to 2.6 on a model of a supersonic transport design study (Bristol type 198). (November, 1964)	Thompson, J. S. and Fail, R. A.
816	23 295	Measurements of dynamic stability from three simplified free-flight models of a supersonic research aircraft (Bristol T.188) over the Mach number range 1.2 - 2.6. (March, 1961)	Turner, K. J.

C.P. No.	Council No.	Title	Author(s)
817	25 028	Wind tunnel tests on a 1/12th scale model of the Bristol type 188 research aircraft with rectangular, wedge intakes at Mach numbers from 2.0 to 2.7. (April, 1963)	Cook, T. A.
818	23 278	Supersonic wind tunnel tests on a 1/12th scale model of the Bristol type 188 research aircraft. Part I M = 1.4 to 2.0	Taylor, C. R. and Cook, T. A.
	23 748	Part II M = 2.0 to 2.7 (September, 1961)	Cook, T. A.
819	26 725	Alleviation of thermal stresses in aircraft structures. (November, 1964)	Capey, E. C.
820	26 698	Analysis of flight loads recorded on Comet 4B aircraft by means of the fatigue load meter. (September, 1964)	Hain Taylor, R.
821	26 227	Experimental investigation of the breakdown of a vortex in a tube. (May, 1964)	Kirkpatrick, D. L. I.
822	26 392	The static pressure distribution around a circular jet exhausting normally from a plane wall into an airstream. (August, 1964)	Bradbury, L. J. S. and Wood, M. N.
823	25 173	A parametric study of take-off and landing distances for high-lift aircraft. (October, 1963)	Mair, W. A. and Edwards, B. J.
824	26 469	Methods and charts for estimating skin friction drag in wind tunnel tests with zero heat transfer. (August, 1964)	Smith, K. G.
825	26 596	A digital recording system for structural research. (August, 1964)	Purslow, D.
826	24 599	Further tests with a variable ramp intake having a design Mach number of 2.2. (February, 1963)	Neale, M. C. and Lamb, P. S.

C.P. No.	Council No.	Title	Author(s)
827	26 531	The time required for high speed airstreams to disintegrate water drops. (May, 1964)	Jenkins, D. C. and Booker, J. D.
828	26 601	Measurements of vortex-breakdown position at low speed on a series of sharp-edged symmetrical models. (November, 1964)	Earnshaw, P. B.
829	25 925	A unified theory of friction, heat transfer and mass transfer in the turbulent boundary layer and wall jet. (December, 1964)	Spalding, D. B.
830	25 965	Slender-body theory calculations of the effect on lift and moment of mounting the wing off the fuselage centre-line. (February, 1964)	Bartlett, R. S.
831	26 678	Preston tube measurements in turbulent boundary layers and fully developed pipe flow. (February, 1965)	Ferriss, D. H.
832	25 515	Review of general operating experience with a jet-lift VTOL research aircraft (Short S.C.1) (August, 1963)	Lean, D. and Chinn, H. W.
833	26 541	A survey of aircraft handling criteria. (December, 1964)	Leyman, C. and Nuttall, E. R.
834	25 667	An experimental check on the theoretical relationship between the spectral density and the probability distribution of crossings for a stationary random process with Gaussian distribution, using data obtained in measurements of aircraft response to turbulent air. (September, 1963)	Burnham, J.
835	26 753	Turbulent-boundary-layer behaviour and the auxiliary equation. (February, 1965)	Nash, John F.

C.P. No.	Council No.	Title	Author(s)
836	27 076	The chance of a rough flight. (February, 1965)	Bullen, N. I.
837	25 796	Handling qualities of aircraft with marginal longitudinal stability. (January, 1964)	Saunders, T. B.
838	25 663	Interim report on low-speed flight tests of a slender- wing research aircraft. (Handley-Page H.P.115). (November, 1963)	Bisgood, P. L. and O'Leary, C. O.
839	26 659	The interpretation of strain measurements for flight load determination. (August, 1964)	Hovell, P. B. Webber, D. A. and Roberts, T. A.
840	26 554	Comparison of seven wing buffet boundaries measured in wind tunnels and in flight. (September, 1964)	Mabey, D. G.
841	25 993	The performance of a centrebody propelling nozzle with a parallel shroud in external flow. Part I. (November, 1963)	Herd, R. J. Golesworthy, G. T.
842	25 205	Vertical accelerations due to structural vibrations of a slender aircraft flying in continuous turbulence. (July, 1963)	Zbrozek, J. K.
843	26 268	The magnetic deflection of short arcs rotating between angular electrodes above and below atmospheric pressure. (October, 1964)	Blix, E. D. and Guile, A. E.
844	27 144	The role of compressive stress in the load and strain fatigue behaviour of H.46 at room temperature. (June, 1965)	Tilly, Dr. G. P.
845	24 630	The lateral oscillation of slender aircraft. (June, 1962)	Ross, A. J. Ph.D.

C.P. No.	Council No.	Title	Author(s)
846	25 709	Low-speed wind-tunnel measurements of the lift, drag, and pitching moment on three symmetrical ogee-wing models and on a symmetrical slender wing-body model. (November, 1963)	Kirkby, D. A. B.Sc., A.C.G.I., .D.I.C.
847	26 486	Measurement of turbulence in the Liverpool University turbo-machinery wind tunnels and compressor. (December, 1964)	Shaw, R. Lewkowicz, A. K. and Gostelow, J. P.
848	23 090	The problem of panel flutter with reference to the Blue Streak and Black Knight vehicles. (May, 1961)	Harris, G. Z.
849	26 078	Low-speed tunnel tests of an aspect-ratio 9 jet-flap model, with ground simulation by moving-belt rig. (April, 1964)	Butler, S. F. J. Moy, B. A. and Hutchins, G. D.
